

Fenote Raey

FENOTE RAEY ACADEMY · FINAL DECISION MEETING

Fenote Raey Academy

One school system for directors, administration, teachers, parents, students, and transport.

የፍኖተ ራእይ አካዳሚ · አንድ ትምህርት ቤት · እያንዳንዱ ሚና · አንድ አውነተኛ መረጃ

Presented by **MaJo Bridge Technologies and Events**

School directors · Administration staff · Parent representatives · Leadership bodies

Owners directed us to proceed. This meeting is the operational yes.

Fenote Raey Academy owners have already seen this system and asked that it be executed. Today we show every body in this room **what they will use, what they will control, and how parents stay informed without gossip or delay.**

ባለቤቶቹ አቅጣጫ ሰጥተዋል። ዛሬ የዳይሬክተሮች፣ የአስተዳደር እና የወላጅ ተወካዮች ውሳኔ ነው።

What we need from you

- Directors: confirm this is how you want to govern the school
- Administration: confirm the daily work is covered
- Parent representatives: confirm families will be safer and better informed
- Other bodies: raise gaps now, not after go-live

THE
PROBLEM

Excel, paper, and WhatsApp are not a school system.

Directors

You hear problems late. There is no single dashboard for attendance, fees, discipline, and quality.

Administration

Rosters, fees, staff, store, and buses live in different files. One error becomes many arguments.

Parents

They wait for a call, a meeting, or a rumor. Grades appear before leadership has approved them.

The line: most tools help the registrar type faster. This one helps Fenote Raey sleep — because one record is true for everyone.

WHO USES IT

Every role in this meeting has a home.

laJo Bridge Technologies and

Fenote Rae

Administration staff

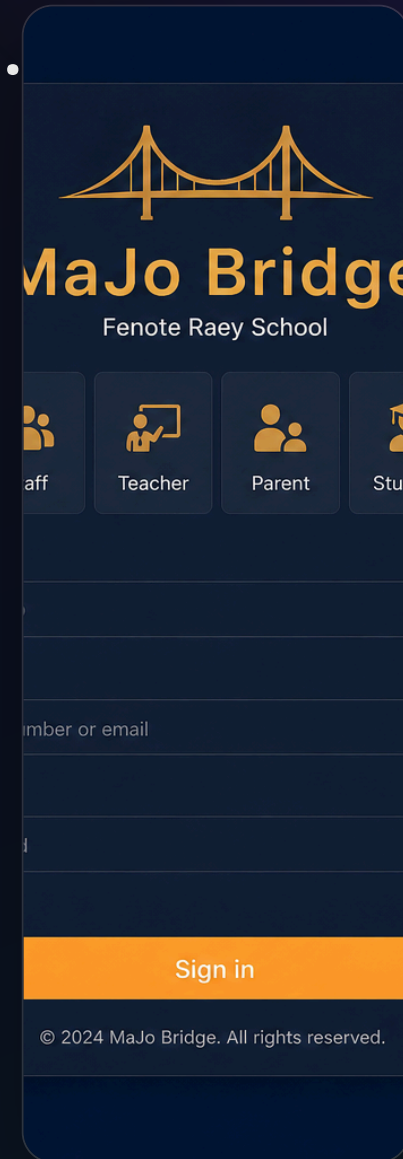

Students

Same School ID.
Different doors.
Nobody sees another
school. Staff only see
the modules their
duty requires.

- **Directors / Principal / VP** — oversight, approvals, reports
- **Registrar, finance, HR, store** — daily administration
- **Teachers** — class, attendance, grades, homework
- **Parents & students** — the child, not the whole office
- **Drivers** — route, scan, live location

ACCESS

One login. School ID + phone or email.

Web for the office. Phone for teachers, parents, and drivers. First login forces a new password. Temporary passwords are shown once — then destroyed.

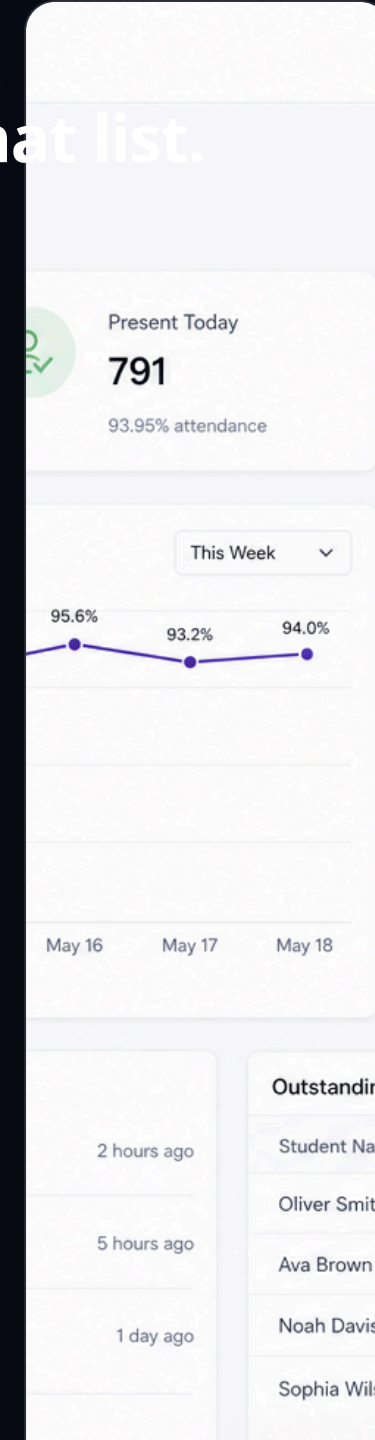

- Languages in the product: English, Amharic, Afaan Oromo
- Forgot password by school ID + email (password is never sent in the message)
- Live web: <https://mayabela.pages.dev>

የትምህርት ቤት መታወቂያ + ስልክ ወይም
ኢሜይል። የመጀመሪያ መግቢያ ላይ የይለፍ ቃል
ይቀየራል።

FOR SCHOOL DIRECTORS

Command of the school in one screen.

Students are a register, not a chat list.

This is what leadership opens every morning:

- Who is present / absent today
- Outstanding fees and collections
- Pending grade and parent-link approvals
- Buses that are live
- Reports you can export (Excel, CSV, PDF)

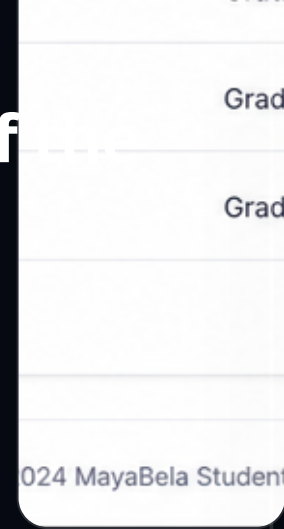

Institution, school profile, campuses, quality-assurance findings, and audit log sit behind this — not

TRUST — THE SENTENCE TO REMEMBER

Teacher enters. Leadership approves. Then the parent sees.

- Enroll with a short student ID (STU-####)
- Date of birth is required so parents can link safely
- Transfers and promotion are a workflow, not a deleted row
- Parent requests wait for registrar / section director approval

The class is the job. The system stays out of way.

- Student This is the difference between a discipline cases and a portal and a leave school requests
- Draft DOB → no link
Approved link → parent sees only their child.
- Section Director / designated approvers publish
- Parents never receive an unapproved mark
- Attendance is saved by the teacher and visible in admin

The parent sees the child — not the school's internal politics.

- My classes, reports the same day / attendance (የ /
- Link with Student ID, non-work date of birth, Extensive project then wait for grades and school approval submit for
- Attendance, approved, approved, timetable, grades, learning homework, materials, announcements
- Fee balance and Messages announcements within the
- Bus tracking, school's allowed when the driver is sharing channels
- Homework location teachers can
- Messages to manage that the people the class timetable school allows — Teachers do not get the finance office, the whole staff directory, or

TRANSPORT

TRANSPORT **The bus is part of the school, not a private WhatsApp.**

አይታዩም፤ ሌሎች ስለምትገኙት ተማሪዎች ልጆችዎን ይገልጹ፡፡

Collections you can defend in a board meeting.

- HR / transport
- Fee structures admin. and payments buses, in ETB, drivers, routes, riders
- Outstanding vs collected, by day and month
- Driver app: route, passenger view for linked list, QR children onboard / discharge, leadership — live map
- not a private cashier live position notebook only while sharing is on and fresh
- Stale location is not shown as "live"

This is the module parent

Books, chalk, and purchases leave a trail.

Total Quantity		
2,450		
All items in stock		
All Statuses		
Quantity	Unit	Unit Cost (UGX)
1,200	Pieces	500
300	Boxes	2,000
25	Kits	50,000
150	Boxes	5,000
75	Reams	7,000

- representatives usually ask
- about first. It is blind — not a purchase
 - separate tracking → approval → receive
 - Issue requests from departments → store keeper
 - Procurement, store, and accountant see the same numbers

This is where leakage usually hides in a paper school. Majo Bridge makes it a workflow.

What the school is buying — module by module

AREA	MODULES	WHO IT SERVES
Organization	Institution, School profile, Campuses	Owners, directors
Academics	Classes, examinations & grade approval, attendance, classroom teachers, timetable	Principal, VP, section director, teachers
Student services	Students, parent-link approvals, transfers, student affairs	Registrar, student affairs
Finance branch	Fees & payments, inventory / procurement / store	Accountant, procurement, store
HR & transport	HR hub, administration staff, buses, drivers, live GPS	HR, transport admin, drivers
Learning & comms	Library, e-books, announcements, events, calendar, messages	Everyone with a duty
Quality & insight	QA findings, reports, Maya Assistant	QA, directors
System	Role permissions, audit log, system health, settings	Owner / platform

HOW A
WEEK
LOOKS

Not a theory. A working week.

DAY	WHAT HAPPENS	
1	Office logs in. Rosters and staff passwords work. Structure (grades / sections) is in the system.	Pilot recommendation: 30–60 days, one campus or one grade band, then a board decision to expand.
2	Teachers take attendance and enter subject grades.	
3	Section director approves grades. Linked parents see published results only.	
4	Parents link children (ID + DOB). Registrar approves. Fees and bus appear for that child.	
5	Leadership prints a PDF report. Store / procurement smoke-test if you use it.	

SAFETY

The school's data stays the school's data.

School isolation

Another school cannot open Fenote Raey students, fees, or messages.

Duty-based access

A librarian does not get finance. A teacher does not get the whole payroll. VP can oversee without silently editing everything.

Audit

Sensitive admin actions can be reviewed. Temporary passwords are unique and must be changed.

This is a school operating system from MaJo Bridge Technologies and Events. It is not a government product. It helps Fenote Raey run digitally, with a record the school can stand on.

**THE
ASK** **Recommend this
system for
Fenote Raey
Academy.**

Directors

Endorse the grade-approval rule, reports, and oversight dashboard.

Administration

Endorse students, fees, HR, store, and transport as the daily books.

**Parent
representatives**

Endorse child-only access, approved grades, and live bus when the school runs transport.

Next step after this room: 30–60 day pilot on one campus/grade, support Mon–Sat 09:00–18:00 EAT, then expand.

TRY
IT IN
THE
ROOM

Live system — not a brochure.
