COMPANY PROFILE

Majo Bridge Technologies and Events PLC

The company behind MaJo e-School Bridge

We design and operate one school operating system. A school opens it in the browser and on the phone. On the screen the name is **MaJo Bridge OS**. The product is **MaJo e-School Bridge**. We own the software. Each school owns its own students, staff, and records.

Who we are

An Ethiopian technology company building the desks a school actually uses: academics, students, parents, finance, people, transport, and the messages between them. The software speaks English, Amharic, and Afaan Oromo. People can reach us Monday to Saturday, 09:00–18:00 East Africa Time.

The software in one line

One record for each student. Teachers take attendance and set work. Leaders approve marks before a parent sees them. Offices export the same live figures. A person sees only the work their role allows. Another school cannot open this school's records.

Five doors into the same school

1 Administration

Owners, principals, registrar, finance, human resource, and IT.

2 Teacher

Attendance, homework, marks, lesson plans, and parent messages.

3 Parent

Published grades, attendance, homework, fees, the bus, and messages.

4 Student

Timetable, homework, materials, examinations, and announcements.

5 Driver

The assigned bus and live GPS for the route.

MAJO BRIDGE TECHNOLOGIES AND EVENTS PLC

The software, desk by desk

Every working part of MaJo e-School Bridge

Academics

Marks, lessons, and the school day

- Academic management
- Weighted markbook
- Examinations and approvals
- Exam bank and papers
- Report cards
- Attendance
- Homework
- Lesson plans
- Timetable
- Curriculum office
- Learning space (LMS)
- Grade workflow
- At-risk insights
- Analytics and exports

People, money, and stores

The offices beside the classroom

- Finance
- Payroll
- Human resource
- Leave and contracts
- Inventory, procurement, and store
- Administration staff

School life

What families see and share

- Library
- e-Books and materials
- Announcements
- Messages
- Events
- Gallery
- Calendar
- Maya Assistant

Students and care

From admission to the family

- Student records
- Admissions
- Transfers and promotion
- Parents and link approvals
- Student affairs and discipline
- Student support
- Clinic reports
- Safeguarding
- Student programs
- Alumni

Campus and movement

The grounds, the bus, the camera

- Campus management
- Transport
- Buses
- Live GPS
- Driver registration
- CCTV
- Digital operations

Leadership and control

Who may see, and what changed

- Institution management
- School management
- Role permissions
- Audit log
- Reports
- Quality findings and plans
- System health
- Go-live and compliance

How a school uses it

One system, from the first bell to the report

01

The morning register

Attendance is taken once and stays on the student record.

02

The class work

Homework, lesson plans, and materials sit with the class.

03

The mark

Teachers enter marks. Leaders approve them. Parents see them after they are published.

04

The family

Messages stay between the people who are linked to that student.

05

The office

Leaders open one live report instead of keeping a second spreadsheet.

What the school keeps

Students, staff, marks, and files stay in that school’s own space. Roles decide who can see a record and who can change it. The audit log keeps a history of important actions. The school’s own name and mark appear on its report cards.

How a school starts

We match the software to the school’s offices, load the opening data, set the school’s brand, train the people who will use it, and open the doors on go-live day. A commercial offer for the modules the school selects is prepared on its own.
