Companion to the 12 September 2026 technical proposal

FOR THE TABLE · NOT A SECOND SPECIFICATION

A discussion with Lebawi International Academy

How we talk through the Terms of Reference, what is already live, and what LIA still decides

PREPARED FOR Lebawi International Academy — Academic Directors, DoSA, QA, IT, leadership, and the Board	PREPARED BY Majo Bridge Technologies and Events +251 911 646 444 · nabilmaya6464@gmail.com
DATE 14 September 2026 · Discussion paper v1.0	BRING TO THE ROOM This paper + the technical proposal PDF + a laptop on https://mayabela.pages.dev

One sentence for the opening. The Academic Management System LIA asked for in the TOR is already built. This meeting is not to invent software. It is to agree how LIA will use it, who sits in which role, and the first go-live week.

1. Purpose of this discussion

Use this paper in a 45–60 minute roundtable. The long specification is the technical proposal. This paper is the conversation.

1. Confirm we understood the TOR in LIA’s own offices — DoES, DoMS, DoHS, DoSA, QA, teachers, parents.
2. Show that those needs sit on live desks, not on a roadmap slide.
3. Leave the room with named people, a first-week plan, and open questions written down.

“Thank you for the time. We prepared a full technical proposal. Today we will not read fifty pages. We will walk the TOR in school language, open the live system if you wish, and end with decisions LIA owns.”

2. Suggested agenda (60 minutes)

Mins	Topic	Owner in the room
------	-------	-------------------

5	Opening and what “implemented” means	Majo Bridge
10	What LIA asked for, in five sentences	Both
15	Live walk: markbook, attendance, parent, at-risk, reports	Majo Bridge + one LIA teacher/director
10	Roles: who at LIA maps to which desk	LIA leadership
10	Privacy, MFA, Friday snapshot, what we do not claim	IT + Majo Bridge
10	Decisions, first week, support	Both — write names below

3. What we are saying — and what we are not

We are saying	We are not saying
The TOR functional work is implemented in Majo e-School Bridge.	LIA data is already fully migrated. People and rosters are still LIA’s cutover.
55+ modules are live. Excel is an export, not the master gradebook.	Teachers may never download Excel. They can. They must not keep it as the official mark.
At-risk students are flagged by a school rule: low marks and high absence together.	There is a secret AI that predicts the child’s future.
Parents see published grades on web or the Android app after the school approves the link.	Every parent is already online. Linking is a LIA process.
1,000 concurrent users and 99.5% uptime are the go-live operating targets.	We printed a laboratory SLA certificate. The go-live desk is honest about this.

“Most school systems help the registrar type. This one helps the director see the same child the teacher, the counselor, and the parent see — with the right limits.”

4. Five sentences that cover the TOR

If the room only remembers five lines, use these.

1. **One child.** SIS is the student. LMS, attendance, markbook, fees, bus, and support all use that id.
2. **One gradebook.** Teachers enter marks in the weighted markbook. Exams can push into it. Parents see marks only after approve-and-publish.
3. **One attendance story.** The daily register feeds trends, parent notices, DoSA oversight, and at-risk flags.
4. **One conversation.** Parent-teacher messages and class discussion live in the communication platform. Not a Telegram group as the official record.
5. **One door per person.** Roles hide desks. Safeguarding never appears to parents, students, or classroom teachers.

5. Discussion by TOR area

Each block is a prompt. Read the question, let LIA talk, then point at the desk. Do not debate whether the module exists. Debate how LIA will run it.

5.1 Replacing Excel and paper summaries

Question for the room: which office still keeps a private grading spreadsheet today, and who will stop treating it as the master after go-live?

- **Live answer:** Markbook is the master. Reports → Academic / Grade analytics workbook downloads a copy.
- **LIA action:** Name the Section Director who approves marks before parents see them.

5.2 Student performance, grades, attendance, at-risk

Question: when a Grade 8 child is slipping, who at LIA should see the name first — homeroom, DoMS, counselor, or QA?

- **Live answer:** At-risk & insights flags the child only when average is below 50% and absence is high enough. Analytics and QA snapshots read the same stores.
- **LIA action:** Agree the follow-up path. The software flags. People still counsel.

If someone asks for “predictive AI,” say: “We implemented the TOR need — finding at-risk students — with a rule you can audit. We did not hide a model you cannot explain to a parent.”

5.3 LMS, assessment, and the gradebook

Question: should LIA keep a separate learning app, or is class + subject on the LMS hub enough for this year?

- **Live answer:** LMS hub is lesson plans, homework, materials, exams, class discussion, and the SIS roster. Exam attempts can push into the markbook.
- **LIA action:** Pick one class for the first live week so teachers are not asked to move every subject on day one.

5.4 Parents and the mobile app

Question: who at LIA will approve parent-link requests in the first two weeks — homeroom, registrar, or Student Affairs?

- **Live answer:** Parent signs in with School ID and the phone on file, links with student id + date of birth, then waits for approval. They then see published grades, attendance, homework, fees, bus, messages.
- **LIA action:** Write that approver’s name in Section 8.

5.5 DoSA, counseling, career guidance, safeguarding

Question: is LIA comfortable that counselors and career guidance sit on the Student Affairs role, and that safeguarding is a sealed desk?

- **Live answer:** We did not invent extra staff-role keys. DoSA, counseling, and college guidance use Student Affairs. Safeguarding cases never go to parents, students, or classroom teachers. Grievances stay on DoSA; they are not mixed into discipline.

- **LIA action:** Name DoSA and the safeguarding officer. Confirm they accept this mapping.

5.6 Academic Directors and department heads

Question: will DoES, DoMS, and DoHS each hold a Section Director login, and will department heads share that academic-lead desk?

- **Live answer:** Section Director is the Academic Director / department-head mapping: classes, students, exam approval, reports, curriculum review, academic evaluations.
- **LIA action:** One named director per school (elementary / middle / high), plus any department head who must review plans.

5.7 QA, leadership, audit

Question: should QA be read-only on academics and write-only on observations, audits, and the audit log?

- **Live answer:** QA observations are not teacher_evaluations. Curriculum evaluations stay on the curriculum desk. QA and Vice Principal can open the audit log. Leadership meetings sit on the staff calendar.
- **LIA action:** Name the QA lead and whether the Vice Principal also watches the log.

5.8 IT, privacy, MFA, daily snapshot

Question: who is LIA's Administration Staff (IT Admin) for Friday snapshots and MFA help — without giving them Full Access?

- **Live answer:** IT Admin maps to Administration Staff: digital ops, go-live, CCTV, system health. MFA is an authenticator people can enrol. Go-live reminds the school when the last snapshot is older than 24 hours. That is a checklist, not a second backup product.
- **LIA action:** Name the Friday owner. Decide who must enrol MFA (recommend: finance, registrar, owner).

6. Live demonstration (if a projector is available)

Open <https://mayabela.pages.dev>. If the screen looks old, hard-refresh with **Ctrl+Shift+R**.

1. Sign in as administration / director — show the sidebar length. “These are the 55+ desks.”
2. Students — open one SIS profile. “Health, marks, clubs, documents are this child, not four files.”
3. Markbook — “This replaced Excel.”
4. Attendance intelligence — “At-risk is a rule, not magic.”
5. Reports — Academic Excel / Grade analytics workbook.
6. Go-live — Training, snapshot reminder, privacy queue.
7. Optional: parent door on a phone.

If GitHub or a PDF link fails with a 503, that is a public website cache, not the school system. Use the copy already in *docs/proposals* or the jsDelivr mirror.

7. What LIA still owns after this meeting

Work	Who	Tool already in the product
School id, campuses, terms, classes	Registrar + Majo Bridge	School / Academic Management
Import students (name, grade, class, date of birth)	Registrar	Go-live → Import
Create teachers and staff; hand temp passwords once	HR + IT	Add Teacher / Add Administration Staff
Approve parent links	Named approver	Parents & Link Approvals
First week of live attendance and markbook	Teachers + Section Director	Attendance, Markbook, Grade Approvals
Friday snapshot	Administration Staff	Go-live → Backups

“We built the school operating system. You still run the school. Our job after today is configuration, training, and standing next to you in week one.”

8. Decisions to write before we leave

Fill this table in the room. Empty cells mean the discussion is not finished.

Decision	LIA name / note
Pilot start date (recommend one campus or one grade first)	
Registrar	
Section Director — DoES	
Section Director — DoMS	
Section Director — DoHS	
DoSA / counseling / career guidance lead	
QA lead	
IT / Administration Staff (Friday snapshot)	
Parent-link approver	
Who must enrol authenticator (MFA)	

First class/subject for LMS week one	
Open questions for a follow-up	

9. Support after the discussion

Channel	Detail
Phone / WhatsApp	+251 911 646 444
Email	nabilmaya6464@gmail.com
Live system	https://mayabela.pages.dev
Hours	Monday–Saturday, 09:00–18:00 East Africa Time. Full outage: call or WhatsApp

Majo Bridge helps with login, roles, sync, the app, and go-live buttons. LIA enters marks, attendance, announcements, and parent approvals.

10. Close

“The Terms of Reference have been implemented in Majo e-School Bridge. If LIA agrees the role names and the first week, we configure Lebawi International Academy next and train the offices that will actually click the buttons. Thank you.”
