

MayaBela

School ERP Product Guide for Sales

From A to Z: who uses it, what each module does, pricing, onboarding, and support.

MayaBela is a cloud school management system for Ethiopian schools. It combines a web ERP for school administration with role-based portals for teachers, parents, students, and bus drivers all under one school ID, with secure multi-school isolation.

At a glance

- Live web ERP: <https://mayabela.pages.dev>
- Android pilot APK for parents, teachers, drivers, and staff
- Languages: English, Amharic, and Oromo labels in the product
- Billing model: per active student / month (ETB), with a monthly minimum
- Platform owner console for creating and managing schools

Document purpose

This guide is for sales conversations, proposals, and school demos. It explains the software by audience and by functional category so a buyer can see what they are purchasing end-to-end.

1. Who MayaBela is for

Every school gets its own School ID. Users sign in with that School ID plus their role credentials. Data for one school is not visible to another.

Platform owner (you / Maya)

- Create and activate schools from the Platform Console
- Set billing rate, minimum monthly bill, contracted seats, and expiry
- Issue school admin phone + temporary password
- Track onboarding checklist and subscription health
- Bulk SMS, audit log, and schools CSV export

School Admin / Owner

- Full web ERP control of the school
- Campuses, classes, staff, students, finance views, inventory, transport
- Approve parent links; configure student portal and grade workflow
- Must change temporary password on first login

Teachers

- Homeroom and subject teachers
- Attendance, grade entry, homework, learning materials
- QR entry/exit, timetable, messaging, Maya Assistant
- Homeroom: parent-link related approvals where granted

Administration staff (role-based)

- Assignable templates: Principal, Vice Principal, Section Director, Registrar, Finance, HR, Librarian, Procurement, Store Keeper, Transport, QA, Board, and more
- Module permissions follow the EDUABA matrix (plus custom overrides)
- Web ERP modules appear according to grants

Parents

- Link a child with Student ID + date of birth (school approval)
- View attendance, published grades, homework, materials
- Fees view, live bus map (when transport is used), leave / student affairs
- Messages, calendar, timetable, Maya Assistant

Students

- School-configurable student portal
- Profile, grades, homework, materials, attendance, timetable, announcements
- Messaging only if the school enables it

Drivers

- Route and passenger list
- QR scan for pickup / discharge

- Share live GPS location for parent tracking
- Messages and issue reporting

2. How access works (simple path)

- Platform owner creates the school → School ID + admin login are issued
- School admin logs in on web → changes password → sets up structure
- Admin enrolls students and staff → shares each user's temp password once
- Teachers mark attendance and enter grades → approvers publish grades
- Parents link children → see published academic and fee information
- Optional: buses + drivers → parents track the bus live

3. Modules & functions (by category)

Below is the product broken into sales-friendly categories. Web ERP is the primary staff channel; mobile/APK is strongest for teachers, parents, students, and drivers.

A. Academics

- Grade levels, classes/sections, subjects, teacher assignment
- Timetables and daily class activities
- Homework assign and view (teacher / parent / student)
- Learning materials and e-books
- Library catalog and rentals (web)
- School calendar, events, and gallery
- Quality Assurance findings and improvement plans (web)

B. Admissions & student records

- Enroll students with Student ID and date of birth (needed for parent linking)
- Student directory / tables on web
- Internal transfers, external leave, and class promotion
- Student Affairs: discipline cases and parent leave requests
- Student portal settings (what students can see/do)
- Admin student password reset

C. Attendance

- Teachers mark class attendance on mobile
- QR-based entry / exit support
- Admin attendance reports on web
- Parent and student attendance views

D. Grades & report cards path

- Teacher enters grades and submits for approval
- Section Director / examiners approve & publish to parents
- Admin grade overview and workflow settings
- Role-specific grade views for teacher, parent, and student

E. Finance & fees

- Web finance dashboard: collected, outstanding, today, overdue
- Fee status table in ETB; 7-day income snapshot
- Parent fees & payments view
- Permissions for manage fees, record payments, finance reports
- Positioning: school fee tracking & not a full accounting/GL package

F. HR & staff directory

- HR hub: classroom teachers, other employees, transport staff
- Administration staff directory
- Role permission editor (module checkboxes per role)
- Multi-role staff accounts with temporary passwords

G. Inventory & procurement

- Purchase requests and issue requests
- Items, stock in/out, student issued items, classroom inventory
- Assets, suppliers, maintenance records

- Inventory reports

H. Transport

- Bus registry and transport dashboard
- Assign students / Bus Link IDs for parent tracking
- Driver app: route, passengers, QR scan, live GPS
- Parent live bus map
- Transport reports export

I. Communication

- School announcements (role-gated create)
- In-app messaging across admin, teacher, parent, driver (student optional)
- Notifications
- Maya Assistant helper for major roles
- Platform-owner bulk SMS tool

J. Parent portal

- Signup / link child ☐ pending ☐ school approval
- Children hub with attendance, grades, homework, materials
- Fees, bus tracking, student affairs, calendar, timetable, settings

K. Student portal

- Enabled per school; first-login and forgot-password flows
- Profile, grades, homework, materials, attendance, timetable, calendar
- Announcements; messaging only if school turns it on

L. Reports & exports

- Web report packs: Students, Attendance, Academic, Financial, Transport, Teachers, Inventory
- Export Excel / CSV / PDF

M. Platform Console (multi-school control)

- Create school in cloud: name, city, grades, campuses, logo
- Set rate/student/month, minimum monthly, seats, subscription expiry
- Issue admin credentials (unique temp password)
- Onboarding checklist: logo ☐ admin ☐ first student ☐ first parent link ☐ active
- Filter schools (active / blocked / expiring); reload from cloud
- Audit log and schools CSV export

N. Security & school isolation

- School ID required for staff/parent/driver login
- Forced first-login password change (minimum 10 characters; no OTP required for change)
- Per-school cloud isolation (RLS) and role-based permissions
- Web idle session timeout for admin sessions
- Audit logging and system health visibility

4. Channels: Web + Mobile

Channel	Best for
Web ERP (mayabela.pages.dev)	School admin & staff daily operations; Platform Console
Android APK (pilot sideload)	Parents, teachers, drivers, staff on phones
Home-screen web shortcut	Quick access when APK install is not preferred

5. Pricing (ETB)

Default product billing matches Platform Console fields. Teachers, parents, drivers, and staff accounts are not billed per seat ☐ only active / enrolled students.

Item	Amount
Per active student / month	8 ETB (default)

Item	Amount
Minimum monthly bill	500 ETB
Formula	$\max(\text{active students} \times \text{rate}, \text{minimum})$; 0 if no students
Contracted seats	Optional capacity cap; overage flagged
Annual quote option	10 months prepaid = 2 months courtesy (proposal language)

Suggested commercial tiers

Tier	Seats	Notes
Pilot	150	30-60 days; web + APK
Standard	500	Full modules
Campus+	Custom	Multi-campus / training; negotiated rate

Examples

Active students	Monthly bill
0	0 ETB
40	500 ETB (minimum)
100	800 ETB
500	4,000 ETB

6. What is included vs not

Included

- Web ERP + mobile/pilot APK access model
- School isolation, roles & permissions
- Students, attendance, grade approval, publish, parent links
- Fees view, transport/live bus, inventory & procurement
- Reports (Excel / CSV / PDF), announcements, messaging, Maya Assistant
- Platform Console: create school, seats, rate, expiry, onboarding checklist
- Unique temp passwords with forced first-login change

Not included (unless separately contracted)

- Custom development / brand-new modules
- On-site hardware (biometrics, school servers)
- SMS / voice gateway carrier fees
- Google Play / App Store developer account fees
- Large third-party SIS migrations beyond agreed pilot scope
- 24/7 phone SLA

7. Onboarding path (Day 0 → go-live)

A. Platform owner → Day 0

- Open Platform Console → Add school (cloud create)
- Set grades, campuses, rate, minimum, seats, expiry
- Issue admin phone + temp password; confirm Active status
- Watch checklist: logo → admin → first student → first parent → active

B. School admin → Day 1

- Login with School ID + phone + temp password
- Change password (min 10 characters)
- Create campuses / classes as needed
- Enroll students; add teachers and administration staff
- Approve first parent link requests
- Optional: buses + drivers + Bus Link IDs

C. First operational week

Day	Focus
1	Rosters + staff logins working
2	Teachers: attendance + enter grades
3	Approve grades → parents can see published results
4	Parents: link child + fees + bus (if used)
5	Reports PDF/Excel; inventory smoke test if used

8. Demo / pilot reference

- Demo school commonly used in product: Maya School · School ID TB-001
- Primary live URL for demos: <https://mayabela.pages.dev>
- After web updates, hard-refresh with Ctrl+Shift+R
- Android pilot APK: sideload app-release.apk (package com.mayabela.app)

9. Support

Give schools a clear contact path. Before calling, they should note School ID and role, hard-refresh web or reinstall APK, and confirm first-login password change.

Channel	Detail
Phone / WhatsApp	+251 911 646 444
Email	nabilmaya6464@gmail.com
Web	https://mayabela.pages.dev
Hours	Mon-Sat, 09:00-18:00 EAT (urgent: call / WhatsApp)

We help with

- Login / password / first-time access
- Role access (who can see which module)
- Sync / data missing across devices
- Pilot APK install and web ERP navigation
- Billing fields (seats, rate, subscription expiry)

One-sentence sales pitch

MayaBela is a cloud school ERP that connects school admin, teachers, parents, students, and drivers in one secure School ID with web for operations, mobile for daily use, and simple per-student ETB billing.
