COMPANION DOCUMENT
Technical Proposal MB-SJ-TECH-2026-11
61 numbered school modules (separate PDF)

THE ONLY FORMULA THIS OFFER USES

Annual licence (ETB) = 30% of enrolled students × pack rate

Billable students = total enrolled students × 30%, rounded to the nearest whole student. Pack rate is ETB 150, 200, or 300 per billable student per year, according to how many of the 61 modules the school switches on. Worked examples below. Fill the blank census table with St. Joseph's actual headcount.

1. How to read this proposal

This paper is the commercial offer. It does not describe how the software works — that is in **Technical Proposal MB-SJ-TECH-2026-11**. Management needs three decisions: (1) how many modules, (2) enrolled students per campus, (3) acceptance of the Dire Dawa installation waiver.

1. Module packs and rates
2. The 30% billable-student rule
3. Worked examples (for planning)
4. Two-campus worksheet (fill in)
5. Installation — including free Dire Dawa installation
6. What the licence includes
7. Payment and validity
8. Numbered module list (for pack choice)

9. Signatures

2. Module packs and rates

Rates are **per billable student per year**, in Ethiopian Birr. They are not per teacher and not per login.

STARTER PACK
≤ 20 modules
150
ETB / billable student / year

- Choose any 1–20 desks from the 61
- Typical: SIS + attendance + markbook + parents

STANDARD PACK
20–40 modules
200
ETB / billable student / year

- Choose 20 to 40 desks
- Typical: academics + students + finance + HR

FULL SCHOOL OS
All 61 modules
300
ETB / billable student / year

- Complete catalogue in the technical proposal
- 41–60 desks are billed at this full rate

Pack	Modules switched on	Rate (ETB)	Unit
Starter	1 to 20	150	Per billable student / year
Standard	20 to 40	200	Per billable student / year
Full	All 61 (also 41–60)	300	Per billable student / year

Boundary rule for management. Exactly 20 modules may be taken as Starter (ETB 150) or Standard (ETB 200); the school picks the pack on the order form. Exactly 40 modules is Standard. The full catalogue of 61 is Full (ETB 300). Chrome screens (personal Profile and Logout) are not counted in the 61 and are never billed.

3. The 30% billable-student rule

From the school's **total enrolled students**, this offer bills **30%** only. That 30% is the billable student base. The other 70% of the roll is not charged. Every enrolled child may still use the system; the 30% is a commercial base, not a login cap.

Step	What to do	Example (1,000 enrolled, full pack)
1	Count enrolled students on the census date	1,000
2	Billable students = 30% of that count	300
3	Choose pack rate	ETB 300 (all 61 modules)
4	Annual licence = billable × rate	300 × 300 = **ETB 90,000**

Effective cost on the full roll, if the school takes the full pack: 90,000 ÷ 1,000 = **ETB 90 per enrolled student per year**. That figure is a check for the board; the invoice still uses the 30% base.

Each campus is counted on its own roll, then added:

Total annual licence = (30% × St. Joseph enrolment × rate) + (30% × Besrate Gabriel enrolment × rate)

4. Worked examples (planning only)

These rows help the board budget before the official census is attached. They are not an invoice.

Enrolled students	Billable (30%)	Starter 150	Standard 200	Full 300
400	120	18,000	24,000	36,000
500	150	22,500	30,000	45,000
600	180	27,000	36,000	54,000
800	240	36,000	48,000	72,000
1,000	300	45,000	60,000	90,000
1,200	360	54,000	72,000	108,000
1,500	450	67,500	90,000	135,000
2,000	600	90,000	120,000	180,000

Amounts in ETB per campus per year. Two campuses = two rows, then add.

Two-campus illustration (not the school's census)

If St. Joseph had 1,000 students and Besrate Gabriel (Dire Dawa) had 500, both on the full 61-module pack:

Campus	Enrolled	Billable 30%	Pack	Rate	Annual licence
St. Joseph School	1,000	300	Full 61	300	90,000
Besrate Gabriel School, Dire Dawa	500	150	Full 61	300	45,000
Combined licence	1,500	450			**135,000**
Installation — St. Joseph			Year-1 onboarding		Included
Installation — Besrate Gabriel, Dire Dawa			Social contribution		**0**
Year-1 cash to budget (this illustration)					**ETB 135,000**

5. Official worksheet — attach the school census

Leave the grey cells blank until the registrar confirms the roll. Same pack may be chosen for both campuses, or a different pack per campus.

Campus	Enrolled (A)	Billable A × 30% (B)	Pack (Starter / Standard / Full)	Rate (C)	Licence B × C
St. Joseph School					

Besrate Gabriel School, Dire Dawa					
Total annual licence					
Installation — St. Joseph (Year-1 onboarding)	Configuration, School ID, training, go-live checklist				Included
Installation — Besrate Gabriel, Dire Dawa	Social contribution — not billed				ETB 0
Year-1 total	Licence total + installation				

Census date: _____ Prepared by (registrar): _____ Checked by (finance): _____

6. Installation, including the Dire Dawa social contribution

Besrate Gabriel School — Dire Dawa city branch — installation is free. MaJo Bridge Technologies and Events will configure the Dire Dawa school ID, switch on the chosen modules, train the local office, and complete the go-live checklist at **ETB 0.00**. This is a social contribution. It is not a discount on the annual licence. The 30% billable-student licence still applies to the Dire Dawa roll unless the board later records a separate written waiver.

Item	St. Joseph School	Besrate Gabriel (Dire Dawa)
School ID and branding	Included in Year-1 onboarding	Included — not billed
Module pack switched on	Included	Included — not billed
Staff role setup and owner training	Included	Included — not billed
Student import coaching (Excel/CSV)	Included	Included — not billed
Teacher / parent briefing session	Included	Included — not billed
Travel to Dire Dawa if required	—	Absorbed as social contribution
Annual licence	Per Section 3	Per Section 3 (not waived)

7. What the annual licence includes — and what it does not

Included in the yearly licence	Not included
Use of the chosen modules on web and Android; school data isolation; product updates to those modules; support Mon–Sat 09:00–18:00 EAT; English, Amharic, Afaan Oromo.	Devices, campus internet, and CCTV cameras; custom software outside the 61-module list; government EMIS filing on behalf of the school; VAT or withholding if legally due (stated on the tax invoice); a second accounting package.

Renewal is annual. The school may move to a larger pack at renewal (Starter → Standard → Full) at the new rate on the then-current roll. Reducing a pack is allowed at renewal; unused months are not refunded.

8. Payment and validity

Term	Offer
Currency	Ethiopian Birr (ETB)
Validity	90 days from 7 November 2026
Year-1 licence	100% on contract signing, against a tax invoice, using the signed census worksheet
Subsequent years	100% annually in advance, on the roll at renewal date, same 30% rule
Installation (St. Joseph)	Included in Year-1 onboarding — no separate installation invoice
Installation (Dire Dawa)	ETB 0.00 social contribution — no installation invoice
Taxes	This proposal is exclusive of VAT or other taxes. Any tax due appears on the invoice as required by Ethiopian law

9. Numbered module list — for pack choice

Tick the desks the school wants. Count the ticks. 1–20 = Starter (150). 20–40 = Standard (200). 61 (or 41–60) = Full (300). Full descriptions are in the technical proposal.

31	Safeguarding	Student services			

10. Acceptance

Signing below accepts this financial offer subject to the attached census worksheet and the technical proposal. It is not a tax invoice. A tax invoice follows contract.
