**DOCUMENT**
MB-SJ-TECH-2026-11 · Version 1.0
7 November 2026

**COMPANION DOCUMENT**
Financial Proposal MB-SJ-FIN-2026-11
Monthly subscription: student count × 30% × pack rate (separate PDF)

**What this paper is.** This is the technical offer for school management. It describes the live product St. Joseph would run: **61 numbered school modules**, five login doors (office, teacher, parent, student, driver), school-by-school data isolation, and a go-live path that also covers the Dire Dawa branch. Price is not in this file. Price is in the financial proposal.

## 1. How to read this proposal

This document is written for directors, the board, finance, and school heads — not for software engineers.

1. How to read this proposal
2. Executive summary for management
3. About MaJo Bridge Technologies and Events
4. What St. Joseph School receives
5. Two campuses, one system
6. The 61-module catalogue
7. Who uses which desks
8. A school day on the system
9. Implementation, training, and go-live
10. Data, privacy, and school isolation
11. What is in scope / out of scope
12. Success measures

13. Next step and signatures

## 2. Executive summary for management

St. Joseph School wants one digital school — not another spreadsheet, not a WhatsApp group, and not a tool that only the registrar can open. **MaJo e-School Bridge** is a school operating system already in production. It covers the offices that run a school: academics, students, parents, fees, store, staff, buses, quality, and ICT.

In management language, the school gets:

- **One student record** that teachers, the registrar, student affairs, and parents share — with the right limits.
- **Marks that stay inside the school until leadership publishes them.** Parents never see an unapproved grade.
- **Attendance, homework, timetable, exams, and report cards** on the same child.
- **Fees, inventory, payroll, and transport** as school offices, not as side files.
- **61 modules** that the school can switch on in bands (starter ≤20, standard 20–40, full 61). The financial proposal prices those bands per student.
- **Besrate Gabriel School in Dire Dawa** as a second campus on the same product, with **free installation** as a social contribution (see the financial proposal).

The remaining work after contract is school operation: student lists, staff roles, training, and the go-live checklist — not a second product to invent.

## 3. About MaJo Bridge Technologies and Events

| Item | Detail |
|---|---|
| Company | MaJo Bridge Technologies and Events |
| System | MaJo e-School Bridge — school ERP / academic management system (MayaBela) |
| This offer | St. Joseph School, with Dire Dawa branch Besrate Gabriel School |
| Access | Web office (no install) + Android app for teachers, parents, students, and drivers |
| Live URL | https://mayabela.pages.dev |
| Languages | English, Amharic, Afaan Oromo |
| Support | +251 911 646 444 · nabilmaya6464@gmail.com · Mon–Sat 09:00–18:00 EAT |

The company remains the system operator. **St. Joseph School remains the owner of its student data.** Another school on the same platform cannot open St. Joseph records.

## 4. What St. Joseph School receives

Five doors. One School ID. Nobody sees another school.

**Office / ERP**
Owner, principal, VP, registrar, student affairs, finance, HR, QA, ICT. Run the school from the 61-module sidebar.

**Teacher**
Homeroom and subject teachers. Attendance, homework, markbook, lesson plans, parent messages — own classes only.

**Parent**
Linked guardians only. Published grades, attendance, homework, fees, bus, messages. Never another family's child.

**Student**
Own timetable, homework, materials, exams, announcements. The school sets from which grade a student may log in.

**Driver**
Assigned bus, passenger list, QR, live map. Parents see the same route from their own door.

## 5. Two campuses, one system

| Campus | Role in this offer | Technical treatment |
|---|---|---|
| **St. Joseph School** | Contracting campus | Own school ID, branding, roles, students, fees, and modules. Professional installation and training as in the financial proposal. |
| **Besrate Gabriel School** Dire Dawa city branch | Sister campus / social contribution | Separate school ID so Dire Dawa data never mixes with the main campus. Same product. **Installation is free** (financial proposal). |

**Management rule.** Two campuses are two schools in the system. A teacher in Dire Dawa does not see Addis / main-campus children. Leadership of St. Joseph can still be granted access to both IDs if the board so decides.

## 6. The 61-module catalogue

These are the licensed desks. **Logout** and a personal **Profile** screen are chrome, not billed modules. The school chooses a pack: **≤20**, **20–40**, or **all 61**. Numbers below are the official catalogue for the financial proposal.

### ORGANIZATION · 01–05 Campus and school identity

**01 Dashboard**
Morning command: attendance, fees, work that needs a director.

**02 Institution Management**
Legal name, licences, governance, campus sites, KPIs.

**03 School Management**
School record, branding, academic year, operating settings.

**04 Campus Management**
Buildings, rooms, and multi-site layout.

**05 CCTV**
Administration camera desk — not a classroom tool.

### ACADEMICS · 06–21 Teaching, exams, and the markbook

**06 Academic Management**
Classes, subjects, terms, teacher assignment.

**07 Examinations & Grade Approvals**
Approve marks before any parent sees them.

### 08 Weighted Markbook
The live gradebook. Replaces the Excel sheet.

### 09 Report Cards
Term reports from the same markbook, then publish.

### 10 Exam bank & papers
Set papers, collect attempts, push scores to the markbook.

### 11 Attendance
Daily register. Feeds at-risk flags and parent notices.

### 12 Homework
Assign, collect, see who submitted.

### 13 At-risk & insights
Low marks together with high absence — a clear school rule.

### 14 Analytics & exports
Class lists, averages, teacher insight, files.

### 15 Classroom Teachers
Who teaches which class and subject.

### 16 Add Teacher
Create a teacher login from HR / academic lead.

### 17 Timetable
Weekly class timetable for staff and students.

### 18 LMS
Course hub: plans, homework, materials, exams, discussion.

### 19 Lesson plans
Weekly plans, submit for review, class link.

### 20 Curriculum office
Units, department-head review, academic evaluations.

### 21 Grade Workflow
School rules for enter → approve → publish.

## STUDENT SERVICES · 22–34 The child, the parent, and student affairs

### 22 Students
The SIS: identity, class, parents, medical flag.

### 23 Admissions
Application stages, exam score, waitlist, enrol into SIS.

### 24 Alumni
Former students after they leave the active register.

### 25 Add Student
One child or Excel/CSV import.

### 26 Student Portal Settings
From which grade a student may log in, and what they may open.

### 27 Student Password Resets
Help desk for student login recovery.

### 28 Student Affairs & Discipline
Conduct cases and student-affairs desk.

### 29 Student support
Counseling, IEP, college guidance, documents.

### 30 Clinic reports
Health room notes for authorised staff.

### 31 Safeguarding
Child-protection files. Hidden from parents, students, and classroom teachers.

**32 Student programs**
Clubs, internships, scholarships, leadership meetings.

**33 Parents & Link Approvals**
Approve a parent only after the child is recognised.

**34 Transfers & Promotion**
In-school movement and year promotion.

## FINANCE · 35–36 Fees and the store

**35 Finance**
Fee types, payments, receipts, finance reports. New school cash starts at zero.

**36 Inventory, Procurement & Store**
Purchase requests, suppliers, receive, issue, stock trail.

## HR & TRANSPORT · 37–45 People who work at the school, and the buses

**37 Human Resource**
Hire and hold staff records.

**38 Leave & contracts**
Staff leave and contract files.

**39 Payroll**
Ethiopian payroll labels, including tax and pension fields.

**40 Administration Staff Directory**
Non-teaching office staff.

**41 Add Administration Staff**
Create a staff login with roles.

**42 Transport**
Assign students to buses.

**43 Buses**
Fleet register and routes.

**44 Live GPS**
Office and parent map of the school bus.

**45 Register Driver**
Driver account for the driver door.

## LEARNING RESOURCES · 46–47 Library and class materials

**46 Library**
Catalogue and lending.

**47 e-Books & Materials**
Class files with access by class or student — this school only.

## COMMUNICATION · 48–52 How the school speaks

**48 Announcements**
Official notices to staff, parents, and/or students.

**49 Events**
School events on the shared calendar.

**50 Gallery**
Photos of school life.

**51 Calendar**
Academic, staff, and all-school dates.

**52 Messages**
Parent–teacher threads and class discussion. Not a public chat.

**QUALITY · 53–55** **How leadership sees the school**

**53 QA Findings & Plans**
Observations, surveys, audits, improvement plans.

**54 Reports & Analytics**
Excel / CSV / PDF of students, attendance, academics, finance.

**55 Maya Assistant**
In-app help for staff navigation.

**SYSTEM · 56–61** **How the school controls the system**

**56 Role Permissions**
The owner ticks which desks each staff role may open.

**57 Audit Log**
Who changed what. Open to leadership and QA.

**58 System Health**
Cloud and storage signals for ICT / administration staff.

**59 Digital operations**
Devices, access help, Friday checklist.

**60 Go-live & compliance**
MFA, privacy, school snapshots, Excel import, training.

**61 Settings**
Language, security, and school preferences.

**CATALOGUE TOTAL = 61** Organization 5 · Academics 16 · Student services 13 · Finance 2 · HR & transport 9 · Learning 2 · Communication 5 · Quality 3 · System 6.

## 7. Who uses which desks

| School role | Typical desks | What they must not see |
|---|---|---|
| School owner / Full Access | All 61, including Institution Management and Role Permissions | — |
| Principal / VP / Board | Dashboard, academics oversight, reports, QA, announcements | Another school's children |
| Registrar | Students, admissions, alumni, transfers | Safeguarding case files |
| Student affairs | Discipline, support, programs, parent links | Payroll and other-family fees |
| Classroom teacher | Own class attendance, homework, markbook | Whole-school finance, safeguarding, other classes |
| Finance / store | Finance, inventory | Unpublished grades, counseling notes |
| Parent | Parent door only | Other children; unpublished marks |
| Student | Student door only | Staff desks |

| | | |
|---|---|---|
| Driver | Assigned bus | Academic records |

## 8. A school day on the system

1. **Morning.** Homeroom takes attendance. Parents of absent children can be notified. The dashboard shows the school.
2. **Lessons.** Teachers follow the timetable, post homework, open e-books for that class only.
3. **Marks.** Scores enter the weighted markbook. They stay unpublished until Examinations & Grade Approvals.
4. **Office.** Registrar admits a child. Finance records a fee. Store issues a book. HR records leave.
5. **Afternoon bus.** Driver opens the passenger list. Parent sees live GPS for the linked child.
6. **Evening.** Parent opens published homework and messages the teacher. Leadership reviews QA or at-risk flags.

## 9. Implementation, training, and go-live

| Phase | What happens | Who |
|---|---|---|
| 1. Contract and school IDs | St. Joseph and Besrate Gabriel each receive a school ID. Modules of the chosen pack are switched on. | MaJo Bridge + school owner |
| 2. Data | Student Excel/CSV import, classes, staff roles, fee types. Historical marks can be entered in the markbook. | Registrar / academic lead |
| 3. Training | Owner, office, teachers, then a parent briefing. In-app manuals stay on the Go-live desk. | MaJo Bridge + school trainers |
| 4. Dry run | One class takes attendance and a sample markbook for one week. | Teachers + VP |
| 5. Go-live | Snapshots, MFA help, Friday checklist. Dire Dawa installation is performed at no charge. | ICT / administration staff |

Office staff use the web. Teachers, parents, students, and drivers may use the Android app with the same School ID.

## 10. Data, privacy, and school isolation

- Each campus has its own school ID. Announcements, e-books, fees, and report cards do not leak across schools.
- HTTPS in transit. Hosted encryption at rest. Optional authenticator (MFA).
- Safeguarding and counseling notes are excluded from parent/student exports.
- The school can take a snapshot from Go-live. The school remains the owner of its records.

## 11. In scope / out of scope

| In this technical offer | Not in this paper |
|---|---|

| | |
|---|---|
| The 61 modules, five login doors, two school IDs, training path, isolation, Amharic / English / Afaan Oromo | Price — monthly subscription, St. Joseph student count × 30% × pack rate — lives only in the **financial proposal**. Dire Dawa is not in that calculation. |
| Configuration of the pack the school buys (≤20, 20–40, or 61) | Custom software that is not in the catalogue; third-party accounting packages; government EMIS filing on behalf of the school |

## 12. Success measures

| The board will know it worked when… | How they will see it |
|---|---|
| Excel is no longer the gradebook | Markbook is the master; Excel is only an export |
| Parents stop chasing rumours about marks | Only published report cards appear on the parent door |
| Directors see the school in the morning | Dashboard: attendance, fees, unpublished cards, work queues |
| Dire Dawa is not a second informal system | Besrate Gabriel runs the same product on its own school ID |

## 13. Next step

Management is invited to (1) confirm the module pack, (2) confirm enrolled student counts for both campuses, and (3) read the companion **Financial Proposal MB-SJ-FIN-2026-11**. A 30–60 day guided trial can be scheduled on a St. Joseph class list before full go-live.
