

One school system. Every role in this room.

Student affairs, quality assurance, classroom management, alumni records, gallery, announcements, calendar, internal messages, homework — and the rest of the school books.

WHY THIS ROOM

Owners directed us to proceed. This meeting is the operational yes.

Fenote Raey Academy owners have already seen this system and asked that it be executed. Today we show every body in this room **what they will use, what they will control, and how parents stay informed without gossip or delay.**

ባለቤቶቹ አቅጣጫ ሰጥተዋል።
ዛሬ የዳይሬክተሮች፣ የአስተዳደር
እና የወላጅ ተወካዮች ውሳኔ ነው።

What we need from you

- Directors: confirm this is how you want to govern the school
- Administration: confirm the daily work is covered
- Parent representatives: confirm families will be safer and better informed
- Other bodies: raise gaps now, not after go-live

THE
PROBLEM

Excel, paper, and WhatsApp are not a school system.

Directors

You hear problems late. There is no single dashboard for attendance, fees, discipline, and quality.

Administration

Rosters, fees, staff, store, and buses live in different files. One error becomes many arguments.

Parents

They wait for a call, a meeting, or a rumor. Grades appear before leadership has approved them.

The line: most tools help the registrar type faster. This one helps Fenote Raey sleep — because one record is true for everyone.

WHO USES IT

Every role in this meeting has a home.

ACCESS

One login. School ID + phone or email.

Same School ID. Different doors. Nobody sees Web for the office. Phone for teachers, parents and drivers. First login duty requires.

Teachers / Principal / Director / Board / School Board then approved, QA, reports

- **Student affairs / registrar** — students, languages in the product: English, Amharic, Afaan Oromo
- **Classroom teachers** — school ID + email (password is never sent in the message)
- **Quality assurance** — findings, plans, follow-up
- **Parents & students** — child only, grades, gallery, messages, bus
- **Finance / store / drivers** — fees, stock trail, live bus

FOR SCHOOL DIRECTORS

Command of the school in one screen.

This is what leadership opens every morning:

- Who is present / absent today
- Open student-affairs cases and homework due
- Outstanding fees, live buses, QA follow-ups
- Gallery, calendar, and unread messages
- Reports you can export (Excel, CSV, PDF)

The sidebar is the school: student affairs, alumni, classroom, QA, announcements, calendar, messages — not three leftover tiles.

Students are a register, not a chat list.

- Enroll with a short student ID (STU-####)
- Date of birth is required so parents can link safely
- Transfers and promotion are a workflow, not a deleted row
- Parent requests wait for registrar / section director approval

Wrong DOB → no link.

Approved link → parent sees only their child.

Discipline and leave are a desk, not a rumour.

- Behaviour and incident cases: investigation → hearing → outcome
- Each case has an owner (homeroom, student affairs, VP)
- Parent leave requests wait for school approval
- Teachers and parents see only what their duty allows

የተማሪ ጉዳይና የዲሲፕሊን መዝገብ
በስርዓት ይቀመጣል።

Graduates stay in the school book.

The screenshot displays a software interface for managing alumni and graduated records. On the left is a vertical sidebar menu with various options. The main area shows a table titled 'Alumni & graduated records' with a sub-note: 'Graduates stay in the school record. They are not deleted rows.' The table has columns for ID, Name, Class, Year, and Status. It contains three rows of data. Below the table, there is a note: 'You should not create a record that your class is graduated. Being records for directors, register, and QM.'

ID	Name	Class	Year	Status
101-10101	John Doe	10th	2020	Graduated - Not in school
101-10102	John Doe	10th	2021	Graduated - Not in school
101-10103	John Doe	10th	2022	Graduated - Not in school

- Final-year promotion can mark a class as graduated
- Transcript / certificate history is not a deleted Excel row
- Directors, registrar, and QA can still open the record
- Alumni are not mixed back into today's attendance list

Teacher enters. Leadership approves. Then the parent sees.

This is the difference between a portal and a school.

- Draft grades stay inside the school
- Section Director / designated approvers publish
- Parents never receive an unapproved mark
- Attendance is saved by the teacher and visible in admin reports the same day

መምህር ያስገባል → አመራር
ያጽድቃል → ከዚያ ወላጅ ያያል።

The class is the job. The system stays out of the way.

- My classes, attendance (P / A / L), homework
- Enter subject grades and submit for approval
- Timetable, learning materials, announcements
- Messages within the school's allowed channels
- Homeroom teachers can manage that class timetable

Teachers do not get the finance office, the whole staff directory, or another campus's children.

Who teaches which class is not a hallway rumor.

- Grades → sections → homeroom teacher → timetable
- Directors see the roster of classroom teachers in one list
- Academic year is visible so last year's assignment is not mixed in
- Teachers then only see the classes they actually own

የክፍል መምህር ማደራጀት በስርዓት
ይታያል።

Post the work. Parents see it. Teachers mark it done.

- Teacher posts title, due date, class, and file
- Parent portal shows the same homework for their child
- Status: assigned → submitted / completed
- No “please WhatsApp the worksheet” for the whole class

የቤት ሥራ በመተግበሪያ ይለጠፋል።
ወላጅ ያያል።

The parent sees the child — not the school's internal politics.

- Link with Student ID + date of birth, then wait for school approval
- Attendance, approved grades, homework, materials
- School gallery and announcements for their child
- Fee balance and calendar events they are allowed to see
- Bus tracking when the driver is sharing location

The bus is part of the school, not a private WhatsApp.

- Internal messages to
- HR / transport team: buses, schools, routes, riders
- Driver app: route, passenger list, QR on board / discharge, live map
- Parent sees a live position only while sharing is on and fresh
- Stale location is not shown as “live”

This is the module parent representatives usually ask about first. It is built in — not a separate tracking company.

Collections you can defend in a board meeting.

- Fee structures and payments in ETB
- Outstanding vs collected, by day and month
- Parent fee view for linked children
- Reports for leadership — not a private cashier notebook

Finance staff manage. Directors oversee. Parents see their own balance.

Books, chalk, and purchases leave a trail.

- Stock on hand
- Purchase requests → approval → receive
- Issue requests from departments → store keeper
- Procurement, store, and accountant see the same numbers

This is where leakage usually hides in a paper school. MaJo Bridge makes it a workflow.

The school speaks in one place. Not four WhatsApp groups.

- **Announcements** — directors post; staff and parents see by role
- **Gallery** — school photos and events, not lost on a phone
- **Calendar** — exams, holidays, meetings, sports day
- **Internal messages** — teacher ↔ parent / staff, logged in the school

ማስታወቂያ፣ ጋለሪ፣ የቀን መቁጠሪያ እና
መልእክት በአንድ ቦታ።

Findings and improvement plans live next to the school, not in a drawer.

- Log a finding: classroom, library, transport, finance...
- Status: open → in progress → closed
- Improvement plans with owner and target date
- Leadership and QA staff see the same book

የጥራት ማረጋገጫ ግኝትና የማሻሻያ እቅድ በስርዓት።

FULL CATALOG
— 40+ MODULES

What the school is buying — module by module

AREA	MODULES	WHO IT SERVES
Organization	Institution, school profile, campuses	Owners, directors
Student services	Students, parent-link, transfers, student affairs, alumni / graduated records	Registrar, student affairs
Classroom	Classes, classroom teachers, timetable, attendance, exams, homework & assignments	Principal, VP, teachers
Communication	Announcements, events & gallery, school calendar, internal messages	Every duty that must speak
Quality	QA findings & plans, reports, Maya Assistant	QA, directors
Staff modules	HR, payroll, leave, staff documents, library, canteen, clinic	HR, librarian, nurse, canteen
Finance & store	Fees, invoices, receipts, expenses, inventory / procurement	Accountant, store, procurement
Transport	Routes, GPS, boarding	Transport admin, drivers, parents
System	Users & roles, audit log, branding, backups	Owner / platform

HOW A
WEEK
LOOKS

Not a theory. A working week.

DAY	WHAT HAPPENS	
1	Office logs in. Rosters, classroom teachers, and staff passwords work.	Pilot recommendation: 30–60 days, one campus or one grade band, then a board decision to expand.
2	Teachers take attendance, post homework, and enter subject grades.	
3	Section director approves grades. Student affairs logs any case. QA opens a finding if needed.	
4	Parents link children (ID + DOB). They see homework, gallery, calendar, and messages for that child.	
5	Leadership prints a PDF. Store / HR / transport smoke-test if you use them.	

SAFETY

The school's data stays the school's data.

School isolation

Another school cannot open Fenote Raey students, fees, or messages.

Duty-based access

A librarian does not get finance. A teacher does not get the whole payroll. VP can oversee without silently editing everything.

Audit

Sensitive admin actions can be reviewed. Temporary passwords are unique and must be changed.

This is a school operating system from Majo Bridge Technologies and Events. It is not a government product. It helps Fenote Raey run digitally, with a record the school can stand on.

**THE
ASK** Recommend this
system for Fenote
Raey Academy.

**Directors /
QA**

Endorse
the
dashboard,
grade-
approval
rule, and
quality
findings.

**Student
affairs /
admin**

Endorse
students,
alumni,
discipline,
fees, HR,
store,
and
transport
as the
daily
books.

**Teachers
/ parents**

Endorse
classroom
tools,
homework
posting,
child-only
access,
gallery,
calendar,
and
messages.

Next step after this room: 30–60 day pilot
on one campus/grade, support Mon–Sat
09:00–18:00 EAT, then expand.

TRY
IT IN
THE
ROOM

Live system — not a brochure.
