Reference	MBT-BUNA-FIN-2026-01
Companion document	Technical Proposal MBT-BUNA-TEC-2026-01 (submitted separately)
Currency	Ethiopian Birr (ETB); prices exclude VAT at 15%
Date of issue	4 November 2026
Valid until	2 February 2027
Classification	Confidential — for the Bank's Board, executive management and evaluation committee only

Board summary

Majo Bridge proposes that Buna International Bank sponsor MaJo e-School Bridge for the schools it introduces. Schools use the full platform free of charge. The Bank pays Majo Bridge one monthly fee per enrolled student, at a rate set by the size of each school. In return the Bank gains the schools' fee, payroll and supplier flows, and a daily digital relationship with every parent and staff member.

Key commercial terms

- **Who pays.** Buna International Bank. Schools and parents pay nothing to Majo Bridge.
- **Price basis.** Per billable student per month, excluding VAT.
- **Rates.** 400 ETB (schools with fewer than 1,000 students), 300 ETB (1,000 to 2,500 students), 200 ETB (more than 2,500 students).
- **Everything included.** All 61 modules, all portals, unlimited staff and parent users, hosting, the Buna integration, onboarding, data migration, training, support and updates.
- **No upfront investment.** No licence, set-up or integration fee. The Bank pays only for schools that are live, and only for students actually enrolled.
- **Term.** Three years, with rates fixed for the first 24 months.

1. Pricing structure

1.1 Rates per student

Tier	School size (billable students)	Rate per student per month (ETB, excl. VAT)	Rate per student per year (ETB, excl. VAT)
Tier A	Fewer than 1,000 students	400	4,800
Tier B	1,000 to 2,500 students	300	3,600
Tier C	More than 2,500 students	200	2,400

- **One rate per school.** The tier is set by the school's total billable students, and that rate applies to every student in the school.
- **Tier set each month.** If a school grows or shrinks across a tier boundary, the new rate applies from the next monthly invoice.
- **School groups.** Each school (or separately registered campus) is assessed on its own students.
- **VAT.** Value Added Tax at 15% is added to every invoice.

1.2 Who counts as a billable student

A billable student is a student with an active enrolment in a Buna-sponsored school on the last day of the billing month. The count comes directly from the platform and is visible to the Bank in the partner portal at all times.

Counted	Not counted
Students with an active enrolment in any grade	Applicants not yet enrolled
Students suspended for a period but still enrolled	Withdrawn or transferred-out students
	Graduated students kept in Alumni
	Parents, teachers, staff and drivers — all users are unlimited and free
	Test or training accounts

2. Worked examples per school

Billable students	Tier	Rate (ETB)	Monthly (excl. VAT)	Annual (excl. VAT)	VAT 15% (annual)	Annual incl. VAT
450	Tier A	400	180,000	2,160,000	324,000	2,484,000
800	Tier A	400	320,000	3,840,000	576,000	4,416,000
1,200	Tier B	300	360,000	4,320,000	648,000	4,968,000
1,800	Tier B	300	540,000	6,480,000	972,000	7,452,000
2,200	Tier B	300	660,000	7,920,000	1,188,000	9,108,000
3,200	Tier C	200	640,000	7,680,000	1,152,000	8,832,000

Annual figures assume 12 billing months. All figures in Ethiopian Birr.

3. Programme cost scenarios for the Bank

The scenarios below show what the programme would cost the Bank at different sizes. School counts and sizes are illustrative; the Bank pays only for schools actually live.

Scenario	School mix	Schools	Students	Monthly (excl. VAT)	Annual (excl. VAT)	Annual incl. VAT
Pilot	5 × 800 students	5	4,000	1,600,000	19,200,000	22,080,000
Year 1	20 × 600 students; 8 × 1,600 students; 2 × 3,000 students	30	30,800	9,840,000	118,080,000	135,792,000
Year 3	60 × 600 students; 30 × 1,600	100	114,000	34,800,000	417,600,000	480,240,000

Scenario	School mix	Schools	Students	Monthly (excl. VAT)	Annual (excl. VAT)	Annual incl. VAT
	students; 10 × 3,000 students					

Blended average rate — Pilot: 400 ETB per student per month · Year 1: 319 ETB per student per month · Year 3: 305 ETB per student per month.

4. Value to the Bank

The sponsorship is a customer-acquisition and transaction programme. Its return comes from the relationships and flows listed below.

Value driver	Source	Indicator for the Bank's model
School operating account	All fee collections settle to the school's Buna account	Average school balance × funds-transfer margin
Parent accounts (CASA)	Parents invited to open or link a Buna account to pay fees	Accounts opened × average balance × margin
Payroll accounts	Staff salaries paid through the Buna payroll file	Staff × average salary balance × margin
Transaction income	Fee, material, transport and supplier payments through Buna channels	Transactions × fee per transaction (as set by the Bank)
Lending	Fee instalment loans for parents; salary advances and personal loans for staff; working capital and asset finance for schools	Loan book × net interest margin
Retention and brand	Schools and families tied to Buna by a platform they use every day	Lower churn; 'Powered by Buna' visibility

4.1 Break-even guide

A simple way for the Bank's treasury to test the programme: the annual sponsorship per student divided by the Bank's net margin on deposits gives the average deposit per enrolled student needed to cover the cost from deposits alone. Transaction income, lending and new customers come on top.

Tier	Annual cost per student	Deposit needed at 6% margin	at 8% margin	at 10% margin
Tier A (400 ETB/month)	4,800	80,000	60,000	48,000
Tier B (300 ETB/month)	3,600	60,000	45,000	36,000
Tier C (200 ETB/month)	2,400	40,000	30,000	24,000

Deposits per student here means the combined balances that the programme brings to Buna — the school's fee account, the parents' accounts and the staff payroll accounts — divided by the school's enrolled students. Margins are illustrative; the Bank should apply its own funds-transfer pricing.

4.2 Ways to maximise the Bank's return

1. **Make Buna the only fee channel.** The sponsorship agreement between the Bank and each school should require fees to be collected into the school's Buna account and through Buna references.
2. **Target the right schools first.** Schools with higher annual fees and larger enrolments bring the most deposits per sponsored student.
3. **Bundle payroll.** Require sponsored schools to pay staff salaries through Buna; teachers become salary-account customers.
4. **Convert parents at sign-up.** The parent app's onboarding offers a Buna account in a few taps; relationship managers and agents follow up on referrals.
5. **Launch education products.** Fee instalment loans, education savings plans for children, and teacher loans, offered in the parent and staff apps with consent.

6. **Extend to all school payments.** Transport, books, uniforms, events and supplier payments as well as tuition.
7. **Use the data, with consent.** Payment history and school cash flow support credit scoring for schools and parents.

5. What the per-student fee includes

Included	Detail
Software	All 61 modules and every portal: administration web portal, teacher, parent, student and driver apps, and the platform console
Users	Unlimited administrators, teachers, staff, parents and drivers
Hosting	Cloud hosting, database, storage, backups, push notifications and the web domain
Buna integration	Design, build, testing and maintenance of the integration services and the partner portal described in the Technical Proposal
Security programme	Hardening, independent penetration test before launch and once a year, two-factor authentication
Onboarding	Configuration of each school, data migration from the school's spreadsheets, training for staff, and parent-activation support
Support	Service levels in the Technical Proposal; named account manager for the Bank
Updates	New features, improvements and security updates released during the term
Co-branding	'Powered by Buna' on the school apps and documents

5.1 Optional services, quoted on request

- Buna-dedicated environment or in-country / on-premises hosting (deployment options B and C) — infrastructure cost passed through at cost, plus set-up.
- Custom development requested by the Bank beyond the integration scope.
- Bulk SMS through a gateway contracted by the Bank or the school.
- On-site support days outside Addis Ababa.
- Source-code escrow arrangement.

6. Billing and payment terms

Term	Proposal
Start of billing	From the month in which a school goes live (first parent invoice issued through the platform)
Invoicing	One consolidated VAT invoice per month to the Bank, with a schedule of billable students per school, after the month ends
Payment	Within 30 days of invoice, by transfer to Majo Bridge's account at Buna International Bank
Verification	The Bank can verify every student count in the partner portal; disputed lines are paid once agreed, undisputed lines on time
Price period	Rates fixed for the first 24 months; thereafter reviewed once a year by agreement, with any increase not exceeding 10%
Term	Three years from signature, renewable by agreement
Adding schools	Any school the Bank introduces can be added at any time at the rates above
Removing schools	With 60 days' notice; the school keeps its data export, and may continue on a direct subscription with Majo Bridge
Taxes	Prices exclude VAT at 15%; any withholding tax applied under Ethiopian law

6.1 Partnership incentives (for negotiation)

Majo Bridge is ready to discuss the following incentives to support the launch. They are not included in the rates above and apply only if agreed in the partnership agreement.

- **Pilot.** The first month of each of the five pilot schools free of charge.
- **Annual prepayment.** A discount for schools whose fee is paid by the Bank twelve months in advance.
- **Portfolio volume.** A reduced rate once total billable students across all Buna schools pass an agreed threshold.

7. Assumptions

- The Bank provides a test environment, interface documentation and a technical contact for the integration within two weeks of signature.
- Each school provides its data in the agreed templates and names a focal person.
- The Bank's own channel changes (mobile app, USSD, branch systems) needed to accept school payment references are made by the Bank.
- Prices are in Ethiopian Birr and assume the scope in the Technical Proposal; material changes in scope are agreed in writing.

8. Validity

This Financial Proposal is valid until 2 February 2027. Final terms will be set out in a partnership agreement between Buna International Bank S.C. and Majo Bridge Technologies and Events PLC.

Sign-off

Submitted on behalf of Majo Bridge Technologies and Events PLC for the consideration of the Board of Directors of Buna International Bank S.C.. This Financial Proposal is valid until 2 February 2027.
